

5TH GRADE

EARTH AND THE SOLAR SYSTEM

Hi 5th Graders! Learning about Earth Science was a fun topic we covered this year. But one BIG question that is still out there is how old the Earth really is and how do we know. Mystery Doug tries to help answer that question for us. Click on the link below or copy into your browser.

You also did your research project on a part of our Solar System of your choice. Let's learn a little more about some of the many other parts to our galaxy that you might not have known about. Attached is a crossword puzzle about the Solar System. Use the internet or books to find the answers and complete the puzzle. Happy hunting!
