

Pizza COLLAGE!

For: Kindergarten, first grade, second grade!

Materials:

scissors
large circle
Elmer's glue
white paper
crayons
construction paper (various colors)

Examples of pizza toppings:
Yellow paper or yellow pieces of yarn for cheese.

Green paper for peppers & broccoli.

Brown paper for mushrooms.

Orange paper for pepperoni.

Black paper for olives.

Give your students more practice with scissors and more practice using liquid glue.

Your kiddos can invent their own pizza!

If you have a **LARGE MIXING BOWL**, trace that on your white paper for the dough.

You can also use a plain white paper plate.

Then grab a smaller sized mixing bowl for tracing the sauce. Try cutting the (sauce) circle in a wavy shape.... create all the toppings using scissors, even adding design with crayons. Glue toppings in place!
